El Paso County, CO Awards Black Creek Video Visitation System Upgrade

El Paso County Criminal Justice Center, Colorado Springs, CO

Birmingham, AL – March 25, 2016 - Black Creek Integrated Systems has been awarded a contract by El Paso County to upgrade the video visitation system at the 2,085-bed Criminal Justice Center located in Colorado Springs, Colorado.

Black Creek will install a total of 148 video visitation stations that includes inmate visitation stations, public visitation stations, and attorney visitation stations. Black Creek will also install a public scheduling kiosk with an integrated driver's license scanner, and provide browser-based video visitation software to allow visitors to visit inmates remotely. Unlike so-called "free" systems by

other companies, Black Creek's revenue sharing model allows the jail to keep the majority of revenue generated from remote visits, which will allow the jail to quickly amortize the cost of the system.

A Black Creek IP Visitor® Video Visitation system enables family members, friends and professionals to remotely visit the incarcerated from their homes or offices. The visitation system is more cost-effective than in-person trips for most visitors to the facility. The system can significantly increase security and generate revenue for a facility.
