Miami-Dade County Awards Black Creek Touchscreen System Upgrade for the Metro West Detention Center

METRO WEST DETENTION CENTER

Birmingham, AL – May 30, 2014 – Black Creek has been awarded a contract to upgrade the existing security system at the Metro West Detention Center in Miami, Florida to a Black Creek Super Display® Touchscreen Security System. The detention center is the largest in the Miami-Dade County Corrections system with 3,098 beds. The Black Creek system has been in use in the facility since it opened in 1993.

The project will include replacing existing touchscreen computers, upgrading existing Black Creek touchscreen and server software, furnishing and installing new hardware, and adding programming for display of 135 additional cameras on the touchscreen control system.

Each Super Display® Touchscreen station features two LCD monitors that display all the facility's security controls and a CCTV camera call-up and video display. An officer can select different camera viewpoints, control facility utilities, and more. Black Creek's Super Display® Touchscreen system makes security control easier and saves facilities money by decreasing maintenance costs and increasing staff efficiency.

More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections. Black Creek focuses only on the corrections market – installing integrated security and records management solutions in jails, prisons, courthouses and government facilities across the nation.
