Black Creek Awarded Contract to Upgrade Pennington County Jail's Security System

PENNINGTON COUNTY JAIL. (PHOTO: PENNCO.ORG)

Birmingham, AL – January 1, 2016 – Black Creek Integrated Systems has been awarded a contract to upgrade the electronic security system for the Pennington County Jail. The jail is a 593-bed facility built in 1989 and is located in Rapid City, South Dakota.

The project involves replacing all of the jail's thirteen existing touchscreen control stations with Black Creek's 32" [Super Display®](#) Touchscreen control stations. Black Creek will also furnish and install a new Digital Video Recording system. Much of the facility's existing equipment such as cameras, locks, and intercoms will be reused.

The system upgrade will make security control easier and save the facility money by decreasing maintenance costs and increasing staff efficiency. Safety of visitors and staff will improve from the new features the current control system does not have. Each Super Display® Touchscreen station will feature up to three LCD monitors that display all the facility's security controls and a CCTV camera call-up and video display. An officer can select different camera viewpoints, control facility utilities, and more.

More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections. Black Creek focuses only on the corrections market – installing integrated security and records management solutions in jails, prisons, courthouses and government facilities across the nation.
