Black Creek Awarded Newport News Security System Installation

Newport News City Jail; Newport News, Virginia

Black Creek is pleased to announce that it has been awarded the contract to retrofit the Electronic Security System at the 525-bed Newport News City Jail located in the City of Newport News, Virginia. Black Creek's Super Display Touchscreen Control System with its inherent ability to utilize existing field devices enabled a budget-conscious approach that met the City's financial needs while at the same time, providing a truly state-of-the-art system.

The Touchscreen System enables locking control of almost 300 individual doors in the jail. The installation of multiple Super Display Touchscreen control stations throughout the jail will empower officers to monitor and manage inmate movement throughout the facility. The project will include upgrade of the intercom and CCTV systems, controllable via the Super Display Touchscreen workstations, which will allow for communication at each security point in the jail. Additionally, the CCTV system upgrade will provide continuous recording of all existing cameras along with real-time video display on the new touchscreens.

More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, Touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections. Black Creek focuses only on the corrections market – installing integrated security and records management solutions in jails, prisons, courthouses and government facilities across the nation.
