Ouachita Correctional Center Awards Black Creek Inmate Video Visitation System

Black Creek is pleased to announce that it has been selected to furnish and install its IP Web Visitor® Internet-based Video Visitation System at the 1062-bed Ouachita Correctional Center in Monroe, Louisiana.

The new visitation system will include detention-grade inmate visitation stations in the inmate housing units, public visitation stations located on-premises but outside the secured detention units, and a public scheduling kiosk to allow the public to enroll as visitors and to schedule visitation sessions all without staff interaction and without entering the confines of the detention facility.

While on site visitation will continue to be free to the public, visitors will also be offered the opportunity to conduct visits from their home or office for a modest fee using any computer equipped with Internet access, a camera, and a microphone. Public visitors, particularly those with young children or the elderly who may find travel difficult, will be able to register as a visitor, schedule visit sessions, and conduct visits remotely, all without traveling to the Correctional Center. The system will allow the public a more convenient method of visiting, reduce the chances for contraband to be smuggled into the facility and generate additional revenue for the Parish.

More about Black Creek's Video Visitation Systems

Black Creek's Video Visitation Systems are an elegant solution for both on and off-premise visiting. IP Visitor incorporates a combination of intelligently-designed hardware and software that is technologically superior to any other visitation system available.
