## Miami-Dade Co. Awards Black Creek Contract to Upgrade Touchscreen Security Control System at Metro West Facility

---

Birmingham, AL – August 19, 2021 – Black Creek has been awarded a contract to upgrade the existing Black Creek [Super Display®](#) Touchscreen Security System Control System at the Miami-Dade County Metro West Detention Facility, and to integrate the touchscreen system with a new Valerus CCTV video management system. Miami-Dade County has utilized Black Creek security control systems in the Jail since 1992.

Black Creek will replace the existing touchscreen control stations at 8 control locations throughout the facility with the latest version, utilizing the Windows® 10 operating system and Black Creek’s latest touchscreen control software. The project also includes furnishing and installing new server computers and a new secure, high-speed VPN appliance for remote diagnostics and support via the Internet. The existing intercom, card access, and Watch Tour Manager® and other system components will be reused.

In addition, Black Creek will also provide an interface to the new Valerus Video Recording and Management System being implemented at the facility by the County under a separate contract with another vendor. This Valerus video management system will replace the existing Vicon CCTV video management system, which has been designated End-of-Life by the manufacturer.

The new Black Creek system will improve the safety of staff and visitors with its enhanced functionality that the current control system does not provide. Each [Super Display®](#) Touchscreen station features HD LCD monitors that display all the facility’s security controls and a CCTV camera call-up and video display. An officer can easily select different camera viewpoints, control facility utilities, and more. The system upgrade will make security control easier and save the facility money by decreasing maintenance costs and increasing staff efficiency.

### More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, Touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections. Black Creek focuses only on the corrections market – installing integrated security and records management solutions in jails, prisons, courthouses and government facilities across the nation.
