ACTS©:

Applied Correctional Transition Strategy Software

*Designed specifically for jail
professionals by jail professionals*

In partnership with Black Creek Integrated Systems, Inc., Corrections Partners Inc, is pleased to present the **Applied Correctional Transition Strategy (ACTS©) Software Package**. Far more than a simple risk/needs assessment, **ACTS©** should be your choice to accommodate all your unique jail transition needs.

EVIDENCE-BASED

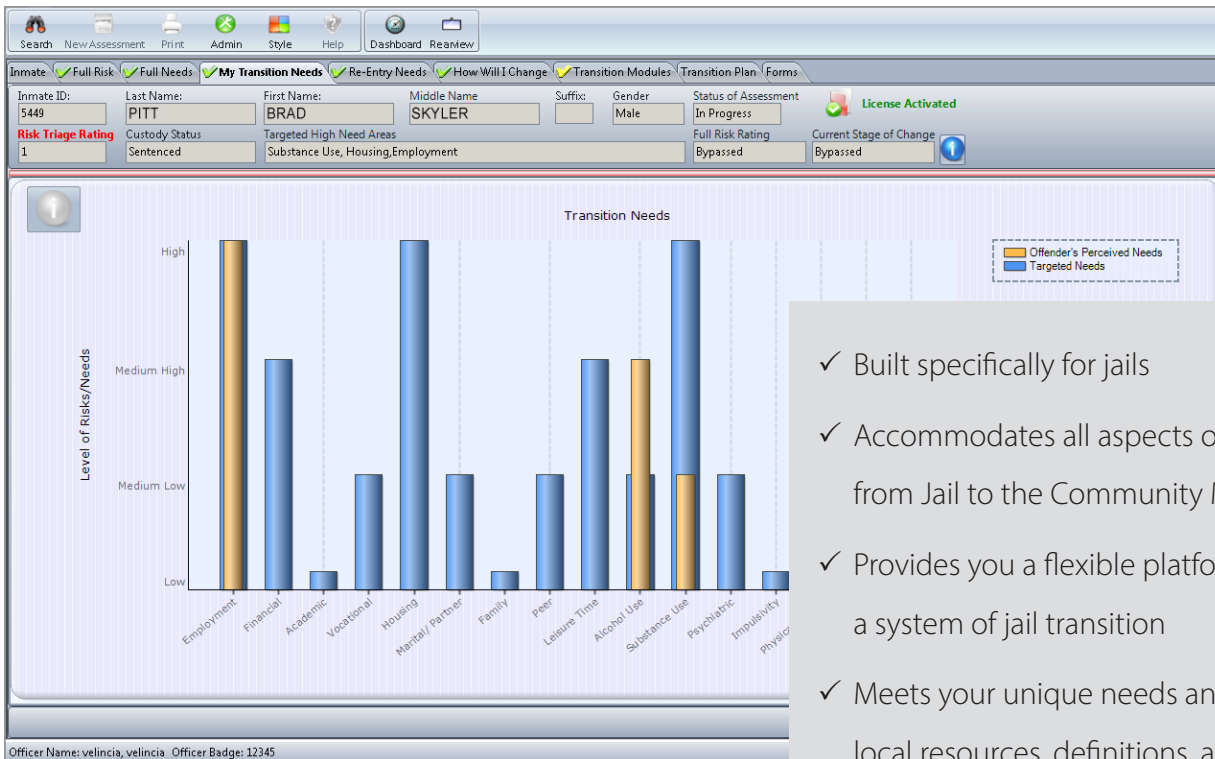

Whether in institutional or community settings, corrections professionals struggle with shrinking resources while managing diverse offender populations and complex organizations. Despite these challenges, research has proven that, when implemented properly, evidence-based policy and practice impacts the rate at which offenders re-offend, enhances long-term public safety, and lowers cost.

COST-EFFICIENT

ACTS© software is the first system of actuarial assessment and case management to be integrated fully with a jail management system offering an array of system and individual reports, quality assurance tools, and structured plans for transition intended specifically for incarcerated populations. **ACTS©** puts information at the fingertips of administrators, officers, practitioners, therapists, and policymakers alike to ensure that the actions that they take lead to the most productive and cost-efficient outcomes.

USER-FRIENDLY

ACTS© will accommodate the formulation of jurisdiction specific offender transition plans, assessment of program, unit, officer, and system efficiency, and evaluation of system service and bed need. Most importantly, **ACTS©** was designed to be extremely user-friendly and complete with prompts throughout to guide corrections professionals in their jail transition efforts and actions.

- ✓ Built specifically for jails
- ✓ Accommodates all aspects of the Transition from Jail to the Community Model
- ✓ Provides you a flexible platform to develop a system of jail transition
- ✓ Meets your unique needs and uses your local resources, definitions, and contacts

REPORTS TO GUIDE OFFENDER RISK/NEED MANAGEMENT:

- Quick Screen Risk Score
- Full Risk Assessment
- Full Assessment of Criminogenic Need
- Assessment of Change Readiness and Criminal Thinking
- Directed, Jurisdiction Specific Transition Planning Inclusive of Suggested, Prioritized Strategies for Behavioral Change
- Targeted Transition Planning Strategies with Progress Notes
- Trackable Outcomes of all Transition Efforts

REPORTS TO GUIDE SYSTEM DECISION MAKING:

- Risk Screening to aid in all decisions from Early Release to Programmatic Assessment and Assignment
- Report of Whole Jail Offender Risk Classification
- Analysis of Jail Offender Need Classification
- Analysis of Offender Outcomes by System, Unit, Program Application, and/or Officer/Practitioner
- Quality Assurance/Fidelity of Application
- Projection of Type and Number of System Bed Needs within the Jail as well as the Community

ACTS® is the only transition application that allows you to manage your entire jail population.

ACTS® effectively reduces the cost of corrections by modifying offender behavior and improving offender outcomes.

ACTS© REPORTING, DATA AND DECISION-MAKING

To facilitate informed decisions, **ACTS©** offers jurisdictions the ability to quick screen with existing data all populations for risk to reoffend; but, for pretrial offenders, the flexibility to bypass a more predictive full risk assessment thus avoiding forensic or legal conflicts.

This flexibility is significant, for it allows pretrial offenders, who comprise well more than 50% of all jail populations, access to important targeted transitional services driven by a comprehensive Needs Assessment without forensic implications or conflicts.

ACTS© also understands the complexity of jail transition, both within the jail, throughout the system, and within the community and therefore offers numerous reports to track progress at the inmate, system, and counselor level.

ACTS© OFFERS:

- Population triage for risk to reoffend
- Assessment of inmate needs
- Matching of needs to local resources
- Case management / progress tracking
- Outcome monitoring
- System performance metrics
