Product Overview

Black Creek's Insignia© Photo ID Badging System is the perfect solution for designing and printing custom ID cards or wristbands and managing card-holder data. Flexible and easy to use, Insignia provides all the tools necessary to create and maintain your own in-house photo ID card or wristband studio and custom cardholder database.

Insignia© consists of five seamlessly integrated modules designed to produce a single, comprehensive solution which will easily meet the needs of even the most demanding photo ID applications:
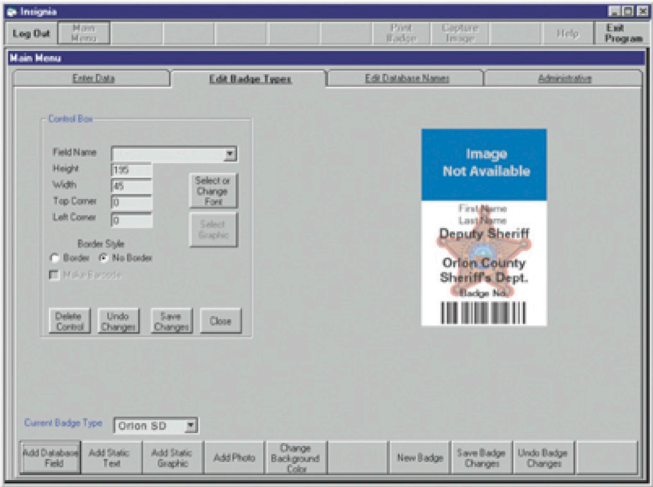

- **The Customizable Cardholder Database Module:** Allows the user to organize data into four categories of 24 fields each.

- **ID Badge Design Module:** Provides the user with the ability to rapidly create and store an unlimited number of ID card or wristband designs.
- **Imaging Module:** Provides the user with the ability to simply and quickly capture high-quality, digital images and automatically incorporate them directly into the Insignia© cardholder database.
- **Data Entry Module:** Allows the user to enter and edit cardholder data, assign a badge design, capture an image and print a photo ID badge or wristband.
- **Security Module:** Provides the Insignia© system administrator with a flexible tool to control operator access to sensitive data or operational features.
