

Black Creek Model IPV-WMS19 IP VISITOR® DETENTION-GRADE STATION

integrity - innovation - quality

Optional all stainless steel enclosure shown

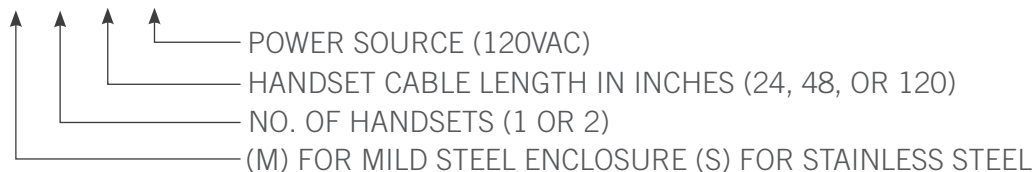

Product Overview

Black Creek's 4th Generation XMS Series Video Visitation Station represents the state-of-the-art in detention-grade video visitation stations. The XMS Series enclosure is constructed of 16 gauge, polyurethane-coated, mild steel with an integrally-hinged, brushed stainless steel cover secured with pick-proof tubular cam locks. Internals consist of an Intel-based computer, HD webcam and 16:9 HD monitor all protected by an impact-resistant, clear polycarbonate viewing window. All internal components are rated for

continuous operation and are forced-air cooled by a tamper-proof fan utilizing a unique internal plenum and exhaust system. Single or optional dual handsets are ADA compliant and detention-grade, featuring integral volume control pushbuttons, armored cables and cradles with concealed magnetic hook switches. The XMS Series station's rugged construction and conservatively rated components will provide years of trouble-free service in even the most demanding correctional environments.

Specifications

Enclosure

- 16 Gauge, Polyurethane Coated, Mild Steel w/ Brushed Stainless Steel Cover
- Optional All-Brushed Stainless Steel
- No-Maintenance, Integrally Hinged Door

Handset

- Hearing Aid Compatible Receiver w/ Armored Cord
- Integral Volume Control Switch
- Chrome Cradle w/ Concealed Magnetic Hookswitch

Computer

- 2.58 GHz Intel Celeron® CPU
- Windows® 10 Standard (Embedded) O.S.
- 500 GB SATA Hard Drive

Monitor

- 19.5" LED-backlit HD Widescreen
- 16:9 Aspect Ratio
- 1366 x 768 Resolution

Camera

- HD USB Webcam

Network

- 10/100/1000 Ethernet

Power

- 120 VAC@ 65 Watts

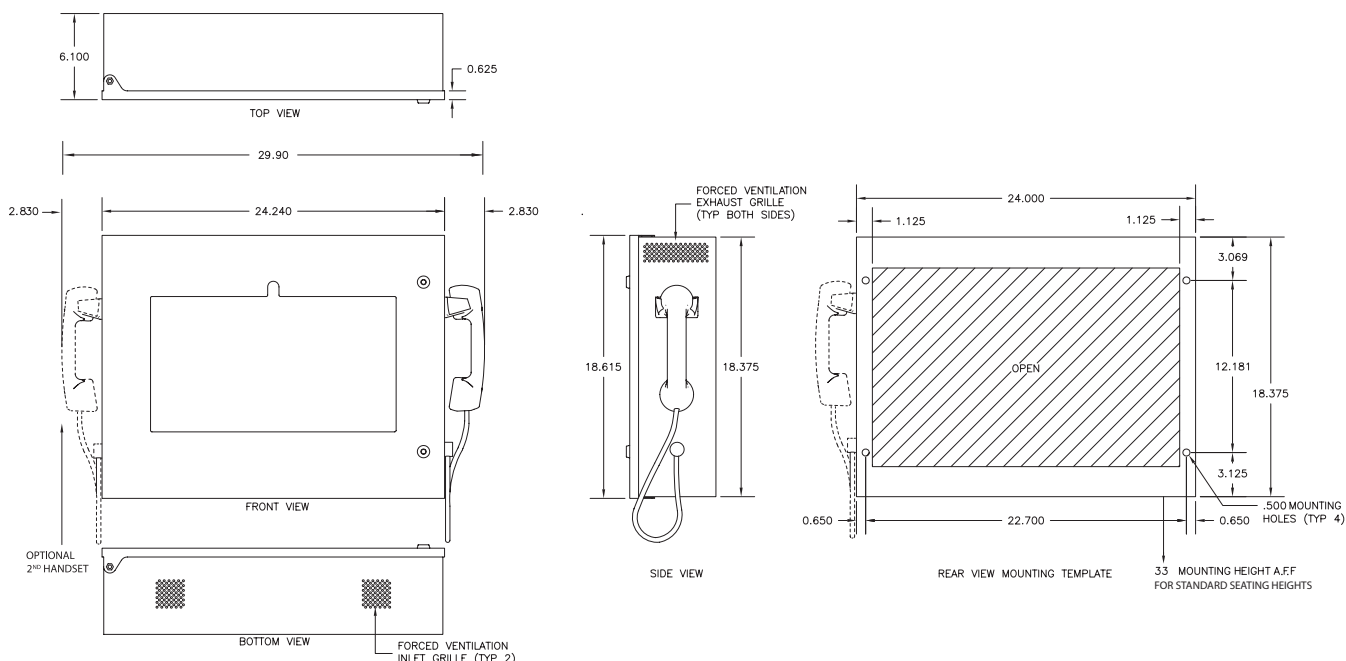

Weight

- 33 lbs.

Approvals (Monitor/CPU)

- UL
- CSA

Black Creek Model IPV-WMFS IP WEB VISITOR® HANDICAPPED/FAMILY STATION

integrity - innovation - quality

Product Overview

Black Creek's IPV-WMFS Handicapped/Family Station utilizes an easy-to-clean Corian® solid surface enclosure secured to a mild-steel subpanel with Torx, pin-head, stainless steel security screws. Station internals consist of an Intel-based computer, webcam, 17" LCD monitor and USB speakerphone with noise-cancelling circuitry which provides crystal-clear, hands-free communications. All

internal components are protected by a 3/8", scratch-resistant, clear polycarbonate viewing window and cooled by natural convection through tamper-proof vents located in the top and bottom of the enclosure. The IPV-WMFS station's rugged construction and attractive appearance will complement any public visitation center.

Black Creek Model IPV-RAC5 IP VISITOR® ROLL-AROUND CART

integrity - innovation - quality

SHOWN WITH IPV-WMS5 STATION

Product Overview

Black Creek's IPV-RAC5 Roll-around Cart is constructed of 11 gauge mild steel with a tough polyurethane enamel coating and is designed to mount the IPV-WMS5 Video Visitation Station. The cart's large, chrome-plated grab handles, heavy-duty industrial-grade casters and durable, foot-operated floor lock assure ease of maneuverability and secure placement. Convenient clips are provided for storage of the 20' high-visibility yellow power and signal cables when the cart is not in use. The IPV-RAC5 provides a rugged and convenient means of taking a video visitation station to a confined or bed-ridden inmate.
